

Information about Cancer Detection Programs in California

Cancer Detection Programs (CDP) provides free breast cancer screening services to low-income, uninsured or under-insured women age 40 or older who reside in California.

These services are provided by many neighborhood clinics throughout San Diego and Imperial Counties.

Women in Action - Scripps Breast Health Outreach and Education Program

Who are we?

Women in Action/Mujeres en Acción is working to educate and increase access to clinical breast exams and mammograms through outreach efforts and public awareness campaigns.

Women in Action targets Latino and Filipino/Asian women, ages 40 and older, who are considered medically under-served.

For women who qualify, the Cancer Detection Program provides the following services at no cost: clinical breast exam, mammogram and diagnostic tests if indicated.

The Women in Action Program builds on existing Scripps programs. Promotoras provide educational workshops related to breast health education to emphasize the messages of the program at health fairs and during presentations.

Presentations:

Please call (619) 862-6600 if you would like to schedule a presentation.

Why is breast cancer screening important?

All women are at risk for breast cancer and are recommended to have screenings for breast cancer on a regular basis. If detected early, breast cancer can be treated successfully.

Breast cancer screening services include:

- A clinical breast examination each year
- A routine mammogram each year

What services are available?

- Clinical breast examination
- Mammogram
- Diagnostic tests if indicated

Who can participate?

- Women who are 40 and older
- Women who can not afford to pay for routine breast cancer screening
- Women who do not have coverage for breast cancer screening through their health insurance
- Women who have private insurance with a high deductible or Medi-Cal with an unmet share of cost
- Women who have limited income
- Women who are uninsured
