Dear Test Analysis Clients,

This notice is provided to inform you that the SOM Test Analysis Service (Scantron exam/survey processing and analysis) will be discontinued as of June 30, 2018.

Over the past several years, as departments have moved to computer-based and on-line testing systems, demand for the Test Analysis Service has declined to the point that is no longer a viable self-supporting enterprise. In addition, application support for the Test Analysis software is limited and the optical scanner is approaching the end of its useful lifespan.

In the unforeseen event that the software or hardware malfunctions and cannot be recovered by the support vendor, the service may be ended earlier than June 30, 2018.

For any questions or comments concerning this notice, please email us at somtests@ucsd.edu.

Thank you,

Brian
